Innovate Consulting Summary

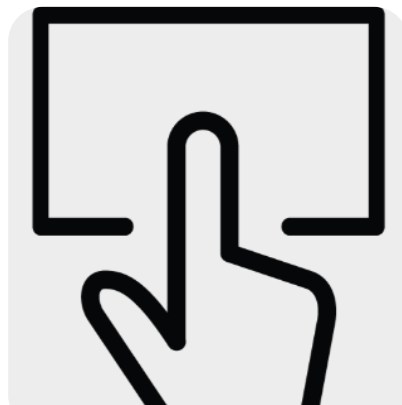

Innovate Consulting offers a full business management consultancy service. We have one aim, to identify your requirements and to deliver a solution tailored specifically to you, to increase your profits and efficiency.

We provide a complete solution from consultancy to training and support. This encompasses the selection and implementation of business software, covering sales, production, distribution, service/project management, and finance.

By working with **Innovate Consulting** you will receive an objective and impartial service to undertake change management within your organisation. We will manage the full lifecycle of your project using methodologies such as Prince II, leaving you free to continue the effective running of your company. Customer service is key – we will work with your relevant personnel to ensure your needs are met to the highest standard.

We have 45 years experience across sectors including; manufacturing, distribution, telecoms, construction, and customer service and facilities management. Our consultants have worked with clients from small though to blue chip companies

Innovate Consulting will provide the service you need at a reasonable cost; our job is to make IT simple for you, leaving you free to concentrate on what you do best. We'll even pay you a quick visit, with no obligation, to outline exactly how we can help and how much you could save, in time and money,

Selection

Products and services

Innovate Consulting provides industry standard products and services. With over 45 years of practical and academic experience, our clients are assured of a first class installation and the highest level of after sales support.

Business software services

Innovate Consulting has experience in sectors including; manufacturing, distribution, telecoms, construction, and customer service and facilities management. We understand the importance of having systems and processes that work efficiently and effectively. Our consultants will work in partnership with your company to understand your business and provide the support you need. Our job is to make change management simple for you to minimise the impact on your day to day business.

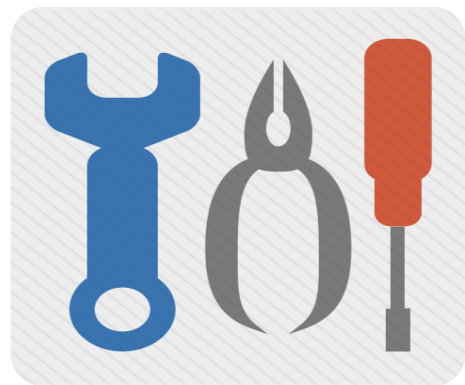

Please contact us to arrange an initial visit, without obligation, where we can outline how we can help to save you time and money.

Consultancy and System selection

Innovate Consulting can do all of the research into potential software or hardware systems on your behalf. We will begin by analysing your existing business processes to develop a statement of requirements to meet your needs. We will then shortlist a number of vendors that are within your budget and produce a report to explain how they will work within your organisation. We will attend demonstrations with your key staff; assist you in selecting the best solution for your business and assist with contract negotiations where appropriate.

We can help with systems including:

- Service Management Solutions
- Accounting Software
- Business software (MRP/ERP) (CRM)

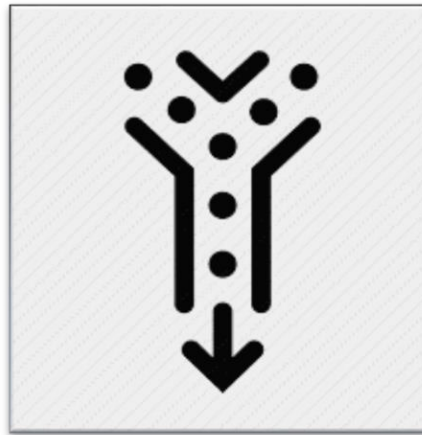

Implement

Project management

Innovate Consulting can manage the entire implementation of your project to ensure you receive the full benefits of your chosen solution, delivered on time and in budget. An external project manager provides an objective viewpoint and is often able to trouble shoot issues during implementation more effectively. It will also leave you and your staff time to continue with the running of your company. We can offer either a day rate or a fixed price so you can plan your costing in advance.

We offer a free appraisal and consultation, so we can get a good understanding of your requirements; we will assess your business processes and give you help and advice for the best solution.
